

Quiet Fitness Cabin

Service design

BRIEF

Quiet Fitness Warehouse is a service design project developed based on the fitness needs of people with social anxiety. Intended to create a more friendly and inclusive fitness service experience for people with social anxiety.

DESIGN GOAL

Through the online appointment mechanism of "old with new" and offline space and equipment design suitable for social anxiety, we ensure that people with social anxiety can enjoy the fun of fitness in a more private environment.

BACKGROUND

My inspiration comes from real-life fitness experiences, where I discovered that there is currently no suitable fitness environment for patients with social anxiety disorder, which prevents them from exercising effectively.

Large space and high foot traffic

The high flow of people in the space makes people with social anxiety afraid to exercise

Passionate about marketing, with a sense of oppression

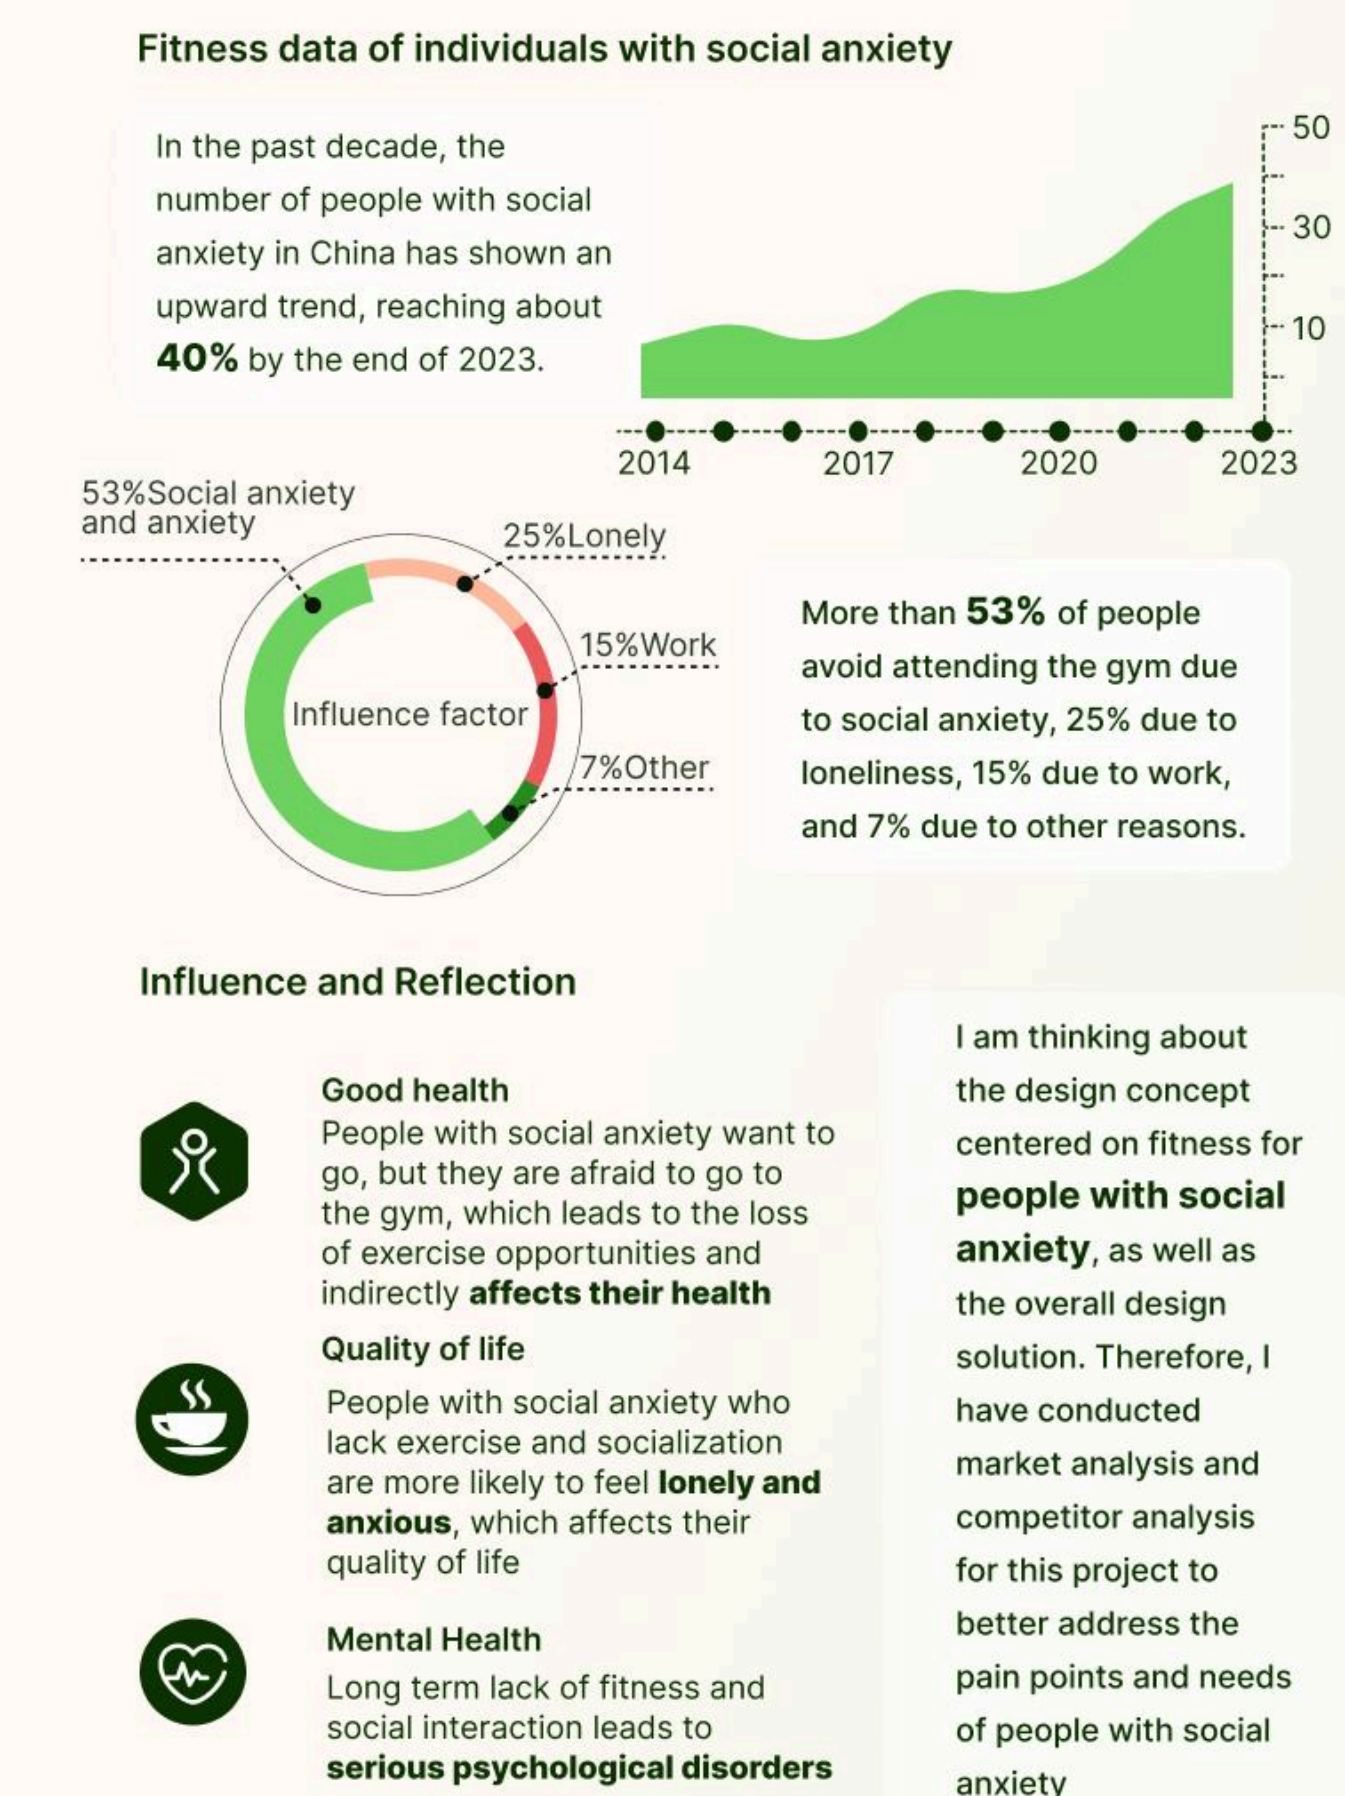

Sales have been consistently promoting and causing resentment

Shy to ask for advice

I don't know how to practice, I'm sorry to ask strangers

The equipment is complex to use and cannot be used

The equipment occupies space and has a single function, with technical barriers to use

SWOT & Competitive analysis

There are currently two existing ways: one is purely online, and the other is offline private space

Fitness software

Personalization, Technical guidance, Privacy, Pay, Function

Private fitness center

Large number of people, Expensive, The instrument has a single function, Limited applicable population

Strengths

Good service, A sound funding chain, Rich courses, Technical cost advantage, Chain scale

Weaknesses

Difficulty in market promotion, Lack of equipment technology, High operating costs, Social barriers among crowds

Opportunities

New products, new markets, Less direct competitors, Vertical segmentation of user groups, Focusing on the needs of social anxiety

Threats

The fitness industry is fiercely competitive, It is harmful to the body, Market acceptance is uncertain, User retention challenge, Sudden events, etc

FIELD RESEARCH

I found that the population of gyms is mainly divided into long-term fitness enthusiasts and fitness anxiety patients.

Fitness enthusiasts

What factors affect your motivation to exercise?

Lack of sense of achievement, Lack of people to exercise together, Many people, small space, single equipment

People with social anxiety

Why don't you want to go to the existing gym?

Sorry to ask for help when encountering difficulties, Afraid of being watched, Afraid of working out alone, Gym operating hours are limited

The social mode of individuals with social anxiety

social anxiety → Online communication → Meet offline

Painpoints classify & Insight

People with social anxiety, Fitness enthusiasts

For users

Fitness Companion, Sense of achievement and motivation in fitness

Gym venue

Large venue, short business hours, Crowds gather, afraid of being watched

Gym equipment

The instrument has a single function, Practical equipment has technical barriers

Professional skills

Lack of fitness technical guidance, dare not ask, Lack of professional guidance on the use of supplies

USER JOURNEY

Before exercising

Find a gym, Step into the gym

Fitness in progress

Warm up, Using equipment, Stretching and Social

After exercising

Bathe, Eating supplies

There are no friends with matching needs, high foot traffic, unfamiliarity with equipment and facilities, and reluctance to step into the gym alone

The venue has a high volume of adult traffic and lacks multifunctional intelligent equipment; Lack of motivation and incomplete training knowledge; I dare not actively request help when encountering difficulties

Worried about physical reasons, afraid of being watched and discussed by strangers; Worried about being criticized for eating supplies in public places

Provide a 24-hour fitness matching platform and collaborate with fitness enthusiasts of the same level to crowdfund professional guidance.

Provide small venue space divided by head count; Install multifunctional assembly fitness equipment; Teaming up with experienced fitness enthusiasts and setting up a check-in mechanism

Display the number of shower appointments on the app to avoid pressure caused by crowds gathering; The app provides user information and dietary advice; Set up a professional supply desk in the independent exercise space to avoid

PERSONA

Fitness expert

China 27, Painpoint, Demand

Social anxiety novices

China 25, Painpoint, Demand

There are fewer gyms open in the evening, There are few fitness equipment in the small venue, Lack of fitness motivation and sense of achievement, I hope to have a more flexible fitness space, I hope to make friends with fitness enthusiasts and work out together, Multi functional equipment

Lack of fitness knowledge, Social anxiety, alone, The gym has a high foot traffic, I hope there are fitness experts to lead the practice, I hope to meet up with friends on a platform to practice together, I hope to have a small training venue

DESIGN CONCEPT

DEFINITION

Why service?

Through a new service system, connect individuals with social anxiety and fitness enthusiasts, provide a more suitable fitness service experience for individuals with social anxiety from the perspectives of space, equipment, and professional skills

People with social anxiety

Need matching fitness buddies, Need professional guidance on fitness, Need a less crowded environment to avoid crowds

Fitness enthusiasts

Fitness equipment that requires free assembly, Need for fitness motivation and a sense of achievement, Gyms that require flexible operating hours

Design innovation point

Firstly, set up each venue with a specific number of people for different sizes to accommodate different groups of people. The curved corridor set up outside the venue avoids the gathering of people. Set up separate supply areas and modular equipment within each venue to maximize the satisfaction of users' training needs

System Map

Use an offline gym to execute a training plan, View equipment assembly and provide services, Select 'Agree to Accept Order' through mobile phone, Make an appointment through mobile phone, Social anxiety novices, Fitness veteran

APP DESIGN

New fitness system platform

Social anxiety novices, Fitness veteran

Main: Community interaction, Matching: Requirement filling, Scan the code, Health: Fitness consultation, Mine: Diet plan

Friend List, Professionals list, Order list, Gym reservation, Bath reservation

Testing

In order to understand the real user experience, based on the design of the low fidelity interface, find fitness users for testing

Important discovery

Users need time to adapt to the matching reservation function, which they believe is the key to the entire system

Improve

Improve the problem of dispersed experienced users in booking appointments, while ensuring information transparency and selecting more familiar users for matching

The font and icon sizes have been enlarged overall, making them more visible and convenient for users to use

HIGH FIDELITY

This is an application primarily designed to meet the fitness needs of users with social anxiety, connected to offline fitness facilities to maximize service. Social anxiety users can match appointment partners online and make appointments with experienced individuals.

Beginner interface

Experienced interface

we will communicate and exchange ideas online with our pre arranged friends to get to know each other and break the ice.

INSTRUMENT DESIGN

The two types of assembly equipment displayed are disassembled from left to right in sequence

(Instrument 1)

(Instrument 2)

Assembly principle

Adopting the traditional Chinese assembly technique of "mortise and tenon", the concave and convex parts are interlocked to achieve a stable connection effect

SPACE DESIGN

SKETCH

1 Appointment verification&group exercise

2 Divide space by number of people, avoid collisions on roads&professional supply areas

3 Assemblable composite equipment&old with new usage guide

SERVICE BLUEPRINT

Time

Online communication, Book a friend appointment, Offline fitness, Supplement after practice

Stage

App, Match appointment partners, Received appointment information, Book a gym appointment, Equipment assembly, Provide fitness assistance, Provide stretching assistance, Book a shower appointment, View supply information, Supplemental nutrition

Service staff

Online communication, Match appointment partners, Received appointment information, Book a gym appointment, Equipment assembly, Provide fitness assistance, Provide stretching assistance, Book a shower appointment, View supply information, Supplemental nutrition

Technology

Support chatting, reservation system, Real time appointment notification system, machine design, Motion Shape Capture, reservation system, Supply Plan Recommendation System

Visual line

Big data recommendation, Payment process, Popularization of related fitness centers, Personalized equipment popularization, Fitness equipment cleaning and management, Installation and regular inspection of intelligent facilities, Cleaning and management of bath equipment, Clean up the supply area and regularly replenish it

Support Process

Big data recommendation, Payment process, Popularization of related fitness centers, Personalized equipment popularization, Fitness equipment cleaning and management, Installation and regular inspection of intelligent facilities, Cleaning and management of bath equipment, Clean up the supply area and regularly replenish it

BUSINESS CANVAS

Key Partner

Cleaning Auntie, Equipment maintenance technician, Supply supplier

Key Activity

Provide a good and comfortable fitness platform for people with social anxiety

Value Proposition

Online matching and appointment with friends with similar needs, Provide an offline gym for exercise, Spliceable fitness equipment provides all-around exercise, To avoid social anxiety situations

Customer Relation

Online appointment for communication and exchange, Make an offline appointment to exercise together

Customer Segment

Novice fitness enthusiasts with social anxiety, Fitness veteran

Channel

App reservation, Offline gym

Key Resource

Online app, Offline gym, Spliceable fitness equipment, Nutritional supply area, Body scanner

Cost Structure

Offline gym, Online app, Cleaning auntie's salary

Revenue Stream

Online reservation system billing commission, Offline gym store usage fees
